Remember to use the right cinematic terms for your answers. Read about the cinematic terms in "The language of film".

Set-up and pay-off

We don't see Natalie sniff cocaine until timecode 6:15 in the movie, but there are a lot of set-ups showing that she has a drug addiction as well as financial trouble.

Watch from the beginning till timecode 5:14 and answer these questions:

- 1) Which set-ups can you find showing her drug and money problems?
- 2) Why do you think her visits in the store are filmed from the street through the window?
- 3) What happens in the two scenes after both of her visits in the store?
- 4) Why do you think the two bathroom scenes show her face in the mirror?
- 5) Compare the three dance scenes (timecode 0:00 – 0:26, 1:40 – 2:06 and 4.13 – 4:44) - How can we tell that she has a drug addiction?

Watch the scene from timecode 5:39 – 6:38.

- 6) How is the scene a pay-off to earlier events in the film?
- 7) Why do you think the light goes out?
- 8) Why do you think the director has chosen the light to go out at exactly that point?
